the **PEOPLE'S**
MONEY

Voting in The People's Money has ended for 2024. All ballots are in the process of being counted.

During the next phase of this process, we will announce the winning projects and issue a Request for Information from organizations to implement those projects. Once implementing organizations are selected, we will work closely with them to ensure they are supported, progress is effectively monitored, and projects are completed successfully. Please visit participate.nyc.gov and follow @NYCCEC on social media for updates.

Lessons Learned

- Understanding the needs of your audience is the most important step of the design process
- Technicality must match user needs
- Nothing is neutral - all design elements convey meaning
